

Forrestal Parking Tips and Suggestions for Our Customers

Department of Energy

Please Note

Reserved parking spaces are limited to those specifically authorized by the Parking Management Office for Government vehicles, visitors, executive officials and disabled individuals. Please, do not park in these spaces unless authorized.

Tire Safety Tips

According to AAA, proper tire care and safety is simple and easy. The Rubber Manufacturers Association recommends getting in the habit of taking five minutes every month to check your tires, including the spare.

If you think you may have a tire problem or are unsure of the condition of your tires, consult a tire dealer as soon as possible.

Following is a tire maintenance checklist:

- ◇ Check the pressure. Under inflation is the leading cause of tire failure. It results in unnecessary tire stress, irregular wear, loss of control and accidents. A tire can lose up to half of its air pressure and not appear to be flat.
- ◇ The alignment because a bad jolt from hitting a curb or pothole can throw your front end out of alignment and damage your tires. Have a tire dealer check the alignment periodically to ensure that your car is properly aligned.
- ◇ Regularly rotating your vehicle's tires will help you achieve more uniform wear. Unless your vehicle's owners manual has a specific recommendation, the guideline for tire rotations is approximately every 6000 miles.
- ◇ The tread on your vehicle is very important. Advanced and unusual wear can reduce the ability of tread to grip the road in adverse conditions. Visually check your tires for uneven wear, looking for high and low areas or unusually smooth areas. Also check for signs of damage.

At the End of the Workday

At the end of the workday, all vehicles must be moved within 15 minutes of the posted departure time for the lane (i.e., if the posted departure time is 5:00 p.m., the vehicle must be moved no later than 5:15 p.m.). Every effort should be made to vacate the lane within the 15

minute grace period. Employees who fail to move their vehicles within 15 minutes of the posted departure times or when asked to do so by another employee may receive a violation notice and may be towed; parking privileges for such employees may be terminated.

We are Stacked When It Comes to Parking

Stacked parking describes the procedure for parking vehicles in both the four car lanes and two car lanes.

The procedures to follow when parking in a four car lane is the first car that enters the lane backs all the way in to the back of the lane. Each car thereafter parking immediately in front of the car

before them until four cars are parked in the lane. The procedures for two car lanes is the same, except two cars will be in the lane. Please adhere to this rule in order to maximize the space in each lane and to avoid receiving a ticket of violation.
